PROFILE

I am a proficient web developer with a strong track record in web design. My technical expertise, combined with effective communication skills, enables me to craft innovative solutions to individuals and organizations.

PROJECTS

Hospital Appointment System., *Final Year Project*

2021 - 2024

Hospital Appointment System across different organizations using the blockchain.

Created a private blockchain.

Built user-friendly smart contracts using Remix IDE.

Enabled users to register, enter the patient details, and place orders.

Stored block data in Sqlite3 for easy access. Used Solidity, Python, and Sqlite3 for the project.

CERTIFICATE

Python Full Stack

Training has been successfully completed in Besant Technologies, Kalyan Nagar, Bangalore.
